{e}(c) Medical Separation. (1) A member who has attained his normal retirement date or early retirement date may be involuntarily separated and entitled to an immediate unreduced retirement annuity if it is determined by the board after certification of the director of health, that the member's health is not likely to improve; provided, the member is not eligible for workmen's compensation for the condition causing the involuntary separation.

(2) A member who has not attained his early retirement date and who has contributed to the fund for at least 5 years may be separated and entitled to an immediate unreduced retirement annuity if it is determined by the board, after certification of the director of health, that the member's health prohibits him from satisfactorily performing the duties of any assigned position in the service of the government; provided, the member is not eligible for workmen's compensation for the condition causing the separation.

(3) At least once each year during the first 5 years following the approval of a medical retirement annuity to a member under subsection (2) and at least once in every 3-year period thereafter, the board requires the disabled annuitant to undergo a medical examination at the place of residence of the annuitant or at any other place mutually agreed upon, by a physician or physicians engaged by the board of trustees. If the examination indicates that the annuitant is no longer physically or mentally incapacitated for service, or that he is able to engage in a gainful occupation, payments of disability retirement annuity from the fund shall be discontinued, and the annuitant shall be reinstated in governmental service in a position for which he is found qualified and capable of performing. However, in no case shall the payments be discontinued if the member has attained age 65.

Should the disabled annuitant become gainfully employed in any capacity and his earnings are less than his salary on his medical retirement date or the salary currently paid for a similar position, whichever is lower, the board shall continue a medical retirement annuity in an amount which is equal to the difference, but not to exceed the amount of the medical retirement annuity.

Should any member receiving a medical retirement annuity refuse to submit to the medical examination, payments by the fund shall be discontinued by the board until the withdrawal of his refusal, and, should his refusal continue for one year, all rights of the member to any medical retirement annuity are revoked by the board. After a medical retiree reaches the age of 65, no further annual or 3-year medical examinations may be required.

(4) A member who has recovered from medical retirement and who is restored to active service immediately becomes an active member of the fund and has member contributions deducted from his pay and upon subsequent retirement has his service retirement allowance based upon all creditable service including both that service upon which his medical retirement annuity was based and his creditable service after his recovery.

{f}(d) Early Retirement. A member of the fund may voluntarily retire with a reduced pension if he is at least 55 years of age and has completed 10 years of creditable service.

{g}(e) Vested Retirement. A member of the fund who separates from service on or after 1 October, 1984 and who has completed 10 years of creditable service but is not eligible for early retirement may voluntarily retire with a reduced pension as of the first day of any month after attaining age 55 provided the member does not withdraw his member contributions.

{h}(f) A retired member receiving an annuity who is re-employed by the government in any capacity in which he again becomes a member of the fund, or who is remunerated by the government for personal services in a status other than as an employee or official for a period in excess of six months, including renewals, has his right to receive payment of his annuity suspended for the duration of his employment or contract, but all other rights pertaining to his annuity are retained by him."

Sec 5. 7.1442 is amended to read:

"7.1442 Retirement payments.

(a) Each member shall receive an annual service retirement annuity on retirement equal to 2 percent of the average annual salary of the member multiplied by his total years of service up to a maximum of 30 years. Beginning October 1, 1983, the annual service retirement annuity is increased to retirees by percentage according to the calendar year of retirement as follows:

1982.....	2%
1981.....	4%
1980.....	6%
1979.....	8%
1971-1978.....	10%

Beginning October 1, 1986, the annual service retirement annuity is increased to retirees by percentage according to the calendar year of retirement as follows:

1986.....	2%
1985.....	3%
1984.....	4%
Before 1984.....	5%

Beginning October 1, 1988, the annual service retirement annuity is increased to retirees by percentage according to the year of retirement as follow:

October 1987 to September 1988.....	2%
October 1986 to September 1987.....	3%
September 1986 or Before.....	4%

(b) Service retirement annuities shall be payable in equal monthly installments, rounded to the nearest dollar, as life annuities, and shall not be increased, decreased, revoked, or repealed except for error, or except where specifically otherwise provided.

(c) The first payment of a life annuity shall be made pro rata for the fraction of a month elapsing between the date of retirement and the end of that month. The last payment shall be made as of the date of death.

(d) Instead of an annuity payable for the life of a retired member, the member may elect to receive a lesser retirement annuity during his lifetime but with all or a portion of that annuity continued to a contingent annuitant designated by the member at the time of retirement. The amount of the lesser annuity elected is determined by the board so that the value of that annuity at the time of retirement will be the same as the value of the life annuity otherwise payable without an election. The election may not be permitted by the board unless the value at retirement of expected monthly annuity payments during the life of the retired member is no less than one-half the value of the life annuity otherwise payable without such an election.

(e) Should a member who is eligible for early retirement as provided by 7.1441 retire, the amount of his retirement annuity is determined in the same manner as described, but then reduced by one-fourth of one percent multiplied by the number of completed months in the period which begins at the date of early retirement and ends at the date when the member first would be eligible to retire because of age or accrued service credit with an unreduced retirement annuity.

(f) Should a member who is eligible for vested retirement as provided by section 7.1441 retire, the amount of his retirement annuity is determined in the same manner as described, but then reduced by one-half of one percent multiplied by the number of completed months in the period which begins at the date of retirement, and ends at the date of the member's sixty-fifth birthday. The annuity so determined, that is normal retirement annuity less early-retirement deduction for retirement prior to attaining age 65 as calculated above, will be paid to retiree or beneficiary.

(g) Should a member retire after attaining age 65, the amount of his retirement annuity is determined as described, but is additionally increased by one-fourth of one percent multiplied by the number of completed months in the period which begins on the date of the member's sixty-fifth birthday and ends on the member's retirement date.

(h) Not less often than once every 2 years the board recommends to the Governor, for proposal to the Legislature, that service and medical retirement annuities currently payable to retired members and other annuitants be increased or not. These recommendations by the board are made after due consideration by the board of current conditions, and are accompanied by a statement of the cost of any proposed increase as certified by the actuary."
